

Fitness Coach App - Changes Summary

Date: December 6, 2025

Issues Fixed

1. Preview Loading Issue

Problem: The preview was not loading for testing.

Solution:

- Stopped the production server that was running on port 3001
- Started the development server with hot-reload enabled
- Verified the app is now accessible at <http://localhost:3001>

Status:  RESOLVED - App is now running and accessible

2. Sleep Profile Onboarding Screen Removal

Problem: Screen 6 (Sleep profile) needed to be removed from the onboarding flow since sleep data will come from wearable devices.

Changes Made:

File: `/nextjs_space/app/onboarding/page.tsx`

1. Removed Screen6 Import

```
// BEFORE: Had import for Screen6
import { Screen6 } from '@components/onboarding/screen-6';

// AFTER: Screen6 import removed
// (Only Screen7, Screen8, etc. remain)
```

2. Updated Total Screen Count

```
// BEFORE
const totalScreens = 12;

// AFTER
const totalScreens = 11;
```

3. Updated Screens Array

```
// BEFORE - 12 screens (0-11) including Screen6
const screens = [
  <Screen0 key="0" onNext={handleNext} />,
  <Screen1 key="1" data={formData} updateData={updateFormData} />,
  <Screen2 key="2" data={formData} updateData={updateFormData} />,
  <Screen3 key="3" data={formData} updateData={updateFormData} />,
  <Screen4 key="4" data={formData} updateData={updateFormData} />,
  <Screen5 key="5" data={formData} updateData={updateFormData} />,
  <Screen6 key="6" data={formData} updateData={updateFormData} />, // REMOVED
  <Screen7 key="7" data={formData} updateData={updateFormData} />,
  <Screen8 key="8" data={formData} updateData={updateFormData} />,
  // ... rest
];

// AFTER - 11 screens (0-10), Screen6 removed, progression updated
const screens = [
  <Screen0 key="0" onNext={handleNext} />,
  <Screen1 key="1" data={formData} updateData={updateFormData} />,
  <Screen2 key="2" data={formData} updateData={updateFormData} />,
  <Screen3 key="3" data={formData} updateData={updateFormData} />,
  <Screen4 key="4" data={formData} updateData={updateFormData} />,
  <Screen5 key="5" data={formData} updateData={updateFormData} />,
  <Screen7 key="6" data={formData} updateData={updateFormData} />, // Now follows
Screen5
  <Screen8 key="7" data={formData} updateData={updateFormData} />,
  // ... rest with updated keys
];
```

Status:  RESOLVED

Onboarding Flow After Changes

The new onboarding flow (11 screens total):

1. **Screen 0** - Welcome (1/11)
2. **Screen 1** - Data Sources (2/11)
3. **Screen 2** - Basic Profile (3/11)
4. **Screen 3** - Goals & Priorities (4/11)
5. **Screen 4** - Activity & Training (5/11)
6. **Screen 5** - Diet Preferences (6/11)
7. ~~**Screen 6** - Sleep Profile~~  **REMOVED**
8. **Screen 7** - Location & Weather (7/11)  Now follows Screen 5 directly
9. **Screen 8** - Work Schedule (8/11)
10. **Screen 9** - Equipment & Confidence (9/11)
11. **Screen 10** - App Personality (10/11)
12. **Screen 11** - Final Setup (11/11)

Testing & Verification

- ✓ Development server started successfully on port 3001
 - ✓ App compiles without errors
 - ✓ Onboarding page loads correctly
 - ✓ Progress indicator shows “X / 11” instead of “X / 12”
 - ✓ Screen transitions work correctly
 - ✓ No runtime errors in console
-

What Data is No Longer Collected During Onboarding

Since Screen 6 has been removed, the following fields are no longer collected during onboarding:

- `usualBedtime` - Usual bedtime
- `usualWakeTime` - Usual wake time
- `sleepHoursWorkdays` - Sleep hours on workdays
- `sleepHoursDaysOff` - Sleep hours on days off
- `sleepStruggles` - Sleep-related issues

Note: These data fields are now expected to be populated from wearable device integrations (Apple Health, Fitbit, Garmin, etc.)

Files Modified

1. `/nextjs_space/app/onboarding/page.tsx`
 - Removed Screen6 import
 - Updated totalScreens from 12 to 11
 - Removed Screen6 from screens array
 - Updated array keys for remaining screens

Files Unchanged (Not Deleted)

- `/nextjs_space/components/onboarding/screen-6.tsx` - Still exists in codebase but not imported/used
-

Access Information

Development Server: `http://localhost:3001`

Note: This localhost refers to the computer I’m using to run the application, not your local machine. To access it locally or remotely, you’ll need to deploy the application on your own system.

Next Steps

- ✓ All requested changes have been implemented

-  App is running and accessible
-  Onboarding flow has been updated from 12 to 11 screens
-  Sleep profile screen has been removed from the flow
-  Progress indicators updated correctly

The app is now ready for testing and further development!
